Outback to the Sea 4 Days

SOUTH AUSTRALIAN OUTBACK TO THE SEA 4 DAY ADVENTURE

Enjoy private air travel with your group on board our luxurious aircraft. Indulge in a very personal experience of discovering the best of the South Australian Outback staying in the heart of the Australian bush at Kangaluna Safari Camp. Listen to stories around the campfire, share delicious meals, be amazed by the wildlife around you. Marvel at the spectacular Lake Gairdner. Listen to the stillness of the real Australia. Swim with dolphins and experience playing face to face with agile and friendly Australian Sea Lions as we wade in protected shallow lagoons.

This 4 day (3 night) tour will definitely be one to remember.

PRIVATE AIR TRAVEL

Welcome to Airtours & Platinum Aircraft Charter - owned and operated by professional and passionate people immersing you in the experience of Australia in ways you might never have imagined.

An Outback adventure with Airtours is an experience like no other.

Flying in your private aircraft, with a small group of like minded people and straight to destinations takes the hassle out of travelling, creates more time to enjoy experiences on the ground all whilst enjoying your very own scenic flights along the way.

Safe for independent travellers and couples alike, our whole team looks forward to sharing our tailor made, South Australian and Australia wide air touring options with you.

DAY ONE

Arrive at the Airtours & Platinum Aircraft Charter private passenger lounge by 0730 to meet your fellow guests and Airtours team. There is time for a real coffee before walking straight out to your turboprop aircraft for the short flight across the ocean to land at Port Lincoln.

First we visit a colony of wild koalas at Mikkira Station near Port Lincoln before travelling through farming land to Wudinna, population 600, stopping for lunch along the way. We will pass Wudinna Rock as we travel into the outback to Kangaluna Camp. After a rest at Kangaluna there is an afternoon tour to begin our wildlife experience, the outback animals thrive in this environment. We expect to see three species of kangaroos as well as emus and many birds, returning to Kangaluna after sunset drinks at Kolay Mirica Rocks (organ pipe formations).

pocket, adventures
fill your soul*

AUSTRALIAN SEA LIONS

The Australian sea lion is a pinniped, most closely related to other species of sea lions and fur seals making up the family Otariidae. These mammals use their flippers to propel themselves in water and can walk on land with their flippers. Australian sea lions share distinct features with other sea lions. These include short fur, short flippers and a bulky body.

KANGALUNA SAFARI CAMP

A small family business operated by the owners Geoff and Rene along with their dedicated staff.

The Camp has a central dining room which is mostly open sided but closed when the weather is not so perfect.

The camp is a wonderful place to relax, walk and observe the nature which lives in harmony with our presence. The open Mallee Woodland environment is home to many animals that still use their original tracks through the camp, and over a hundred species of birds frequent the area.

Recycled materials were used in the construction and furnishing of the campsite, giving it a tastefully rustic look. Kangaluna Camp has been developed by its owners from a life time of experience on how to best live in this environment and dry climate. Rain water is collected from the roofs and is the only water source. Techniques are used for its preservation but you still have private showers and flushing toilets.

DAY TWO

Visit an ochre pit on the morning drive to spectacular Lake Gairdner, which is like a piece of Antarctica, with its glistening white salt pan set in the red landscape. Here you can walk on the surface of the lake and look north to see the endless white plain and the striking red surrounds and islands.

The red dunes along the lake yield many animal tracks, flowers in spring, interesting vegetation and birds. Photo opportunities are endless.

This afternoon you drive through a changing landscape, cigar shaped volcanic rock formations, and lots of wildlife. You may see emus and red, western grey and euro kangaroos as we drive through the ancient outback range to Kangaluna Camp.

Enjoy the stars with a computerized telescope after dinner.

Our love is to send you home with the most memorable choice of the holiday you made in Australia.

GAWLER RANGES NATIONAL PARK

Ancient ranges, deep gullies, seasonal waterfalls and rocky gorges, the Gawler Ranges National Park is a majestic, natural wilderness waiting for you to explore.

The Gawler Ranges National Park is a special place where history, conservation and Aboriginal culture come together.

Proclaimed as a national park in 2002, the landscape teems with wildlife and protects rare and threatened plants and animals, including crimson mallee and the yellow-footed rock-wallaby.

The park is famous for the magnificent Organ Pipes, formed over 1500 million years ago as a result of volcanic eruptions. You can find equally stunning rocky outcrops at Yandinga Falls and Kolay Mirica Falls.

DAY THREE

This morning is leisurely and allows plenty of time to walk through the bush near the camp. Later on you will walk on Lake Sturt in the Corrobinnie Depression and see the array of colours and patterns in the bed of the old lake.

This is a geological marvel, with many interesting subjects. Continuing around the lake to Mt Sturt, taking short walks in the nature, you observe a diversity of plants and trees. Visit amazing Pildappa wave rock en-route to an early arrival back to Kangaluna which gives the extra chance to spot some of the 110 species of birds we have observed here and the visiting animals, or relax in the stunning surrounds.

Sunset drinks will finish the day at Sturt's Lake.

you speechless, then
turns you into a
storyteller*

BAIRD BAY SEA LIONS

Alan and Patricia Payne run this family owned business which operates from Baird Bay, a small and remote coastal village situated on the West Coast of the Eyre Peninsula in South Australia.

"Our amazing adventures with the marine mammals of Baird Bay started in 1992. On a day that was warm and calm while fishing in Baird Bay, a young sea lion approached our boat full of curiosity as to what we were and with a "fear" of just what we were up to. We were both just as curious as this young lion, so pulled in our fishing lines and sat watching him. This action consequently bought the timid young lion even closer to our boat and with Alan's curiosity matching that of the lion he could not resist the temptation to slip into the sea and meet this young fellow in his own element, on his terms. An incredible friendship has formed between "us" and "them" since this humble beginning which seems so long ago now.

We have learnt so much, with most of it coming from the sea lions, they are great teachers, their communication skills are excellent. Listen and you learn, no need for speech, action says it all."

DAY FOUR

An early morning drive to Baird Bay we will board the boat for an unforgettable wildlife experience.

On the 5 kilometre journey to a lagoon at Jones Island near Cape Radstock (at 160 metres, it is one of the highest sheer points on the southern coast of Australia) you can watch Bottlenose dolphins ride the bow wave of the boat, and join these magnificent mammals in shallow water.

Cross the bay to visit a resident colony of rare Australian sea lions and experience playing face to face with these agile and friendly mammals as we wade in protected shallow lagoons. You may very well be smooched by these animals! After lunch on the beach we leave Baird Bay and visit Venus Bay, Elliston and enjoy magnificent coastal scenery on the journey to Port Lincoln.

Meet your private aircraft for the quick flight back to Adelaide Airport where your journey ends and your stories begin!
